NJ Transportation Ideas Portal

Welcome! The New Jersey Department of Transportation's Bureau of Research uses this website to gather and share ideas from NJDOT's research customers and other transportation stakeholders.

Research Ideas. We seek to fund research that leads to implementation – to the testing and adoption of new materials and technologies, to better specifications and to greater efficiency. We strive to discover and advance feasible solutions for more durable infrastructure, greater environmental protection and resilience, and improved mobility and safety for residents, workers and visitors.

Innovation Ideas. We encourage the deployment of innovations and knowledge transfer. We work with the New Jersey State Transportation Innovation Council (NJ STIC) whose mission is to identify, evaluate, and where possible, rapidly deploy new technologies and process improvements that will accelerate project delivery and improve the quality of NJ's transportation network.

The graphic features the Department of Transportation logo on the left and the Bureau of Research logo on the right. Below the logos is a collage of images: a busy street with cars, a hand pointing at a screen with various transportation icons, and a city skyline at sunset. A blue starburst shape is overlaid on the bottom right of the collage, containing the text 'DUE December 31st'. A white box with the text 'GOT IDEAS?' is positioned over the street scene.
